Brainstorm & idea prioritization

Our brainstorming sessions help the team collaboratively explore ideas, understand real-world challenges in online learning, and shape LearnHub into a secure, structured, and scalable Learning Management System—even when team members are not physically present in the same location.

- **10 minutes** to prepare
- **1 hour** to collaborate
- **2-8 people** recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

A Team gathering

Team members involved in this session include developers, UI/UX designers, and project stakeholders. The team shares real-life experiences related to online learning challenges, course management difficulties, and user security concerns to build a common understanding before brainstorming.

B Set the goal

The goal of this brainstorming session is to identify user problems and generate innovative ideas for building LearnHub—a secure, structured, and user-friendly Learning Management System that ensures easy navigation, role-based access, progress tracking, and certificate generation.

C Learn how to use the facilitation tools

The team follows standard brainstorming rules such as encouraging open discussion, avoiding early judgment, listening to all ideas, and balancing creativity with technical feasibility to ensure a productive and focused session.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

Students and teachers lack a secure, structured, and user-friendly online learning platform with proper progress tracking and certification.

Key rules of brainstorming

To run an smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

During this stage, all brainstormed ideas were reviewed and grouped based on similarity and relevance. The ideas were clustered to clearly identify core functional areas of the LearnHub platform. Each cluster represents a key aspect of the Learning Management System.

User Experience & Accessibility
Ideas related to easy navigation, simple registration, clean dashboard design, clear course descriptions, and smooth video playback were grouped under this category to enhance student and teacher satisfaction.

Course Management & Content Delivery
This cluster includes ideas focused on course creation, video uploads, structured modules, section-wise learning, and organized content management for teachers.

Authentication & Security
Ideas involving secure login (JWT), password encryption, role-based access control (Admin, Teacher, Student), and protected routes were grouped to ensure safe and reliable system access.

Enrollment & Payment System
This cluster contains ideas related to payment verification, enrollment approval, course access control, and transparent pricing to maintain a secure learning flow.

Progress Tracking & Certification
Ideas such as marking completed sections, tracking course progress, and generating downloadable certificates were grouped to ensure structured learning outcomes.

Admin & Platform Control
This group includes ideas related to admin dashboard management, course deletion control, user monitoring, and overall system supervision to ensure smooth platform operations.

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the lasso pointer holding the **H key** on the keyboard.
